Educating the World

Background

Training & Consulting expertise since 1994

TrainingCity delivers advanced Instructor Led and elearning training programs to clients from all over the world.

Our team is dedicated to the design and delivery of the most effective technology focused training programs available anywhere. Our areas of expertise include Telecommunications, IT Infrastructure, XML, Embedded Systems design, and VHDL/Verilog, and many other fields.

TrainingCity also provides advanced consulting services in the following technology focused areas:

- ***XML/XSL/XSLT design and implementation***
- ***Embedded Linux***
- ***VHDL & Verilog design***
- ***Product Specific Channel Training development & delivery***
- ***eLearning & Blending Training design and selection***

TrainingCity's clients include members of the Global 2000, consulting firms, VARs, and many other forward thinking organizations.

Call today to speak with one of our associates about your unique requirements.

HOT TOPICS

TrainingCity combines real world design experience with the most advanced training & elearning resources to deliver outstanding educational programs.

Call today to speak with one of our associates about your unique requirements.

XML

The Extensible Markup Language (XML) is the universal format for structured documents and data on the Web. Attend our "Fundamentals of XML" 3 day course and get the facts you need today.

VPN

Virtual Private Networking. Separate fact from fiction in this exciting new course from TrainingCity. Review product offerings and understand the issues that will drive your enterprises VPN solutions.

Telecom Fundamentals

Get your entire team up to speed & demystify the buzzwords. From the PSTN to the latest WAN developments, Our Fundamentals of Telecom course can "jump start" your entire team.

MPLS

MPLS is a "must know" technology for everyone in voice & data communications. Learn the latest in our exciting new course.
